**Formal Methods Specification and Analysis Guidebook for the Verification
of Software and Computer Systems**

Volume II: A Practitioner's Companion

May, 1997

Approvals:

Task Lead

John C. Kelly, Ph.D.
Jet Propulsion Laboratory
Pasadena, CA

Concurrence for Publication

Kathryn Kemp
NASA OSMA Software Program, Manager
NASA IV&V Facility
Fairmont, WV

This guidebook is one of the products of a cooperative study to investigate the applicability of Formal Methods and Analytical Verification for critical NASA software systems. This guidebook was jointly developed through cooperative work from three NASA centers: Jet Propulsion Laboratory, Johnson Space Center, and Langley Research Center.

SUGGESTIONS FOR IMPROVEMENTS FORM

Product Name: Formal Methods Specification and Analysis Guidebook for the
Verification of Software and Computer Systems
Volume II: A Practitioner's Companion

Product Version Number: NASA-GB-001-97
RELEASE 1.0

NASA Change Request Tracking Number: _____

Name of Submitting Organization: _____

Organization Contact: _____ **Telephone:** _____
Mailing Address:

Date: _____ **Short Title:** _____

Change Location Tag
(use section or paragraph #, figure #, etc.): _____

Proposed Change:

Rationale for Change:

Note: For NASA to take appropriate action on the change request, we must have a clear description of the recommended change along with supporting rationale.
